

Data Analytics

Grid Measurement & Analysis

Data analytics (part of data science) is a fundamental part of modern data processing. The basic activities related to data science are:

- 1) research and data preparation,
- 2) data representation and modification,
- 3) data processing using calculations,
- 4) data visualization and presentation,
- 5) data modelling

In our team, there are experts who follow the latest trends in data science and use this knowledge to meet the challenges of modern power engineering.

Gridman offers unique services in this area, for example:

- **Data warehouse analysis**
- **Data processing based on customer's requirements**
- **Prediction model design**
- **Proposal of analytical procedures for asset management**
